

Valley Equipment Company, Inc.

Industrial Equipment

Sales, Service & Fabrication

Remanufactured & New Products
Repairs & Retrofits
Short Lead Times

The Valley Way

Since 1952, Valley Equipment has been providing industrial solutions with unparalleled quality and value. Our family owned business takes great pride in the fact that our remanufactured products rival their new OEM counterparts.

We strive to establish long-term relationships, learn about your business and address specific problems with a practical approach to engineering and selection.

Whether the product is pumps, electrical equipment or another type of process machinery, Valley Equipment approaches business with teamwork in mind.

- *Technical Expertise Backed by Years of Experience*
- *A Large Inventory Plus the Ability to Custom Fabricate*
- *Many Manufacturers, Models & Materials*
- *Short Lead Times*
- *Fast Response on Break Downs*
- *Support After the Initial Sale*

■ Griswold 811 ANSI Pump

Pumps, Parts & Sealing Products

Types

- ANSI
- Horizontal Split Case
- Trash
- Vertical Turbine
- Diaphragm
- In-Line
- Positive Displacement
- Sump

Accessories

- Parts
- Seals, Packing & Glands
- Bases & Guards

Process Equipment

Types

- Fans & Blowers
- Mixers
- Storage Tanks & Silos
- Vacuum Pumps
- Heat Exchangers

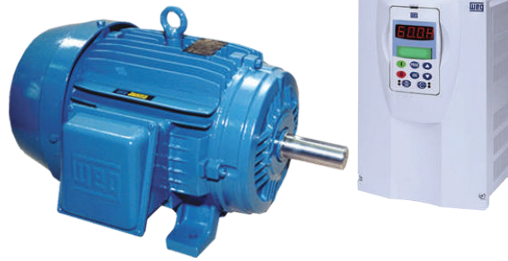

Electrical Equipment & Motors

Types

- Motor Control Centers
- Starters
- Disconnects
- Motors
- Variable Frequency Drives

Valley Equipment is
a Master Distributor
of WEG Electric

Repair - Service - Fabrication

Our Shops: Where Expertise Meets Short Lead Times

Repair- General repair work and rebuilds of all types of industrial process machinery including dynamic fan balancing (in house and on-site)

Fabrication- Our 20,000 sq. ft. facility allows retrofits of tanks, silos, pipe and plate assemblies

Electrical- Specializing in low voltage starts, transformers, motor control centers, disconnects and motors

Machine- CNC machines and lathes, metalizing up to 40"D x 120", low volume production runs available

Shop Online 24/7

- Extensive online inventory features photos, detailed specifications, important product information, and makes it easy to request quotes
- Valley's interactive Pump Part Finder guides you to the parts you want instantly and allows you to request a quote online
- Online project management tools are offered for those jobs that have to overcome multiple physical locations and the challenges they pose to communication. Parties have access to photos, performance data, drawings, spreadsheets, etc. posted behind password protected pages so that important data is always accessible via the internet without sacrificing security

- Valley Equipment's Pump Part Finder makes searching for parts intuitive and fast

Our Story

For over 50 years, Valley Equipment has been a source for quality industrial machinery – both remanufactured and new. We identified a niche in the process machinery market with remanufactured motors and over the decades, our selection has grown to include pumps, mixers, heat exchangers, tanks, silos and other typical industrial products.

Remanufactured equipment has always been our staple product. We are able to buy surplus & quality pre-owned machinery and store it until it is needed – note the acres of inventory below. “Remanufactured” at Valley means a completely repaired piece of equipment. Our technicians clean, inspect, measure, and replace components and make any other needed repairs so that when the equipment ships, it is ready to go online.

In recent years, we have expanded to offer more new equipment to supplement our remanufactured products. That trend has lead to some new partnerships with outstanding vendors. We are now able to say “Yes” to customers and provide new equipment where once upon a time we had to say “No, sorry we don’t have that product to remanufacture.”

The bottom line is that our customers benefit either way - with remanufactured or new equipment. They are assured of an excellent product at an excellent value.

Valley Equipment’s advantage doesn’t end with products. Our shops also offer repair and diagnostic services for customer owned equipment as well as fabrication. With the technical expertise of our staff and their knowledge of industry, our extensive inventory and our shop facilities, we can be of service to you.
